

Stratis Wallet v.0.1.0

Windows 64bit

Feedback

1) App Icon

I would remove the white outline as it looks jagged, especially in the toolbar.

2) When you right click on the Stratis Logo on the Welcome Screen you have an option to save the image. It has no effect and there should be no option to actually save it.

3) Tooltip for Logout Icon. Would be nice to have a tooltip here as some people may not understand the purpose of this icon.

4) The name of the wallet could be larger, maybe even an icon in front of it:

Stratis Wallet v0.1.0 alpha

TEST

5) Overall I would make the grey text either a bit larger or darker as it's barely readable.

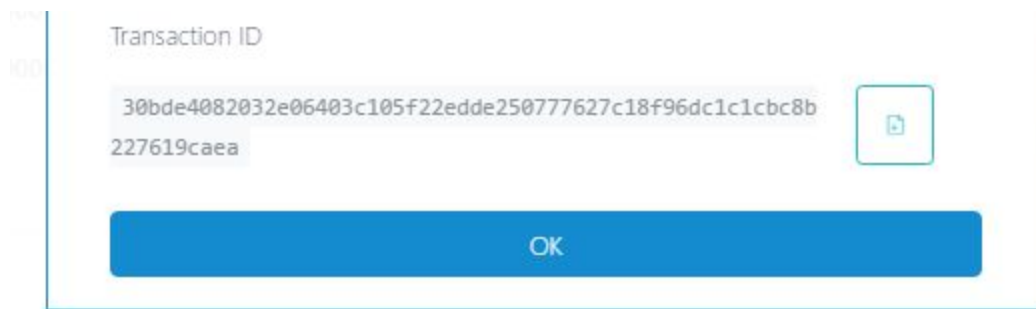

6) I personally would switch the hover state of the buttons to make it more user friendly.

7) The status area looks pixelated as it has been resized too much:

8) The Transaction Details modal could be a bit wider to show the transaction ID without line break. The copy to clipboard icon is too small and not the correct icon. The icon used is for creating a new document.

9) Would be nice to have a qrcode here.
